

← VOTE NOV 6TH or early or by mail.

THANK YOU FOR BEING AN INFORMED VOTER.

Want more info? www.EnglewoodInvisible.org

APRIL FREEMAN for US Congress District 17.

OLIVIA BABIS for FL State Senate District 23.

TONY MOWRY for State House Rep District 17

NICHOLE "NIKKI" FRIED for Commissioner of Agriculture.

League of Conservation Voters.

SEAN SHAW for Florida Attorney General *endorsed by

VOTE FOR THESE PRO-ENVIRONMENT CANDIDATES

Compare to Desantis' record on Environment: He was given a score of 2%, which means he voted against the environment 98% of the time. "...Desantis has a terrible environmental voting record, merely echoes the failed policies of Rick Scott & Donald Trump." Sierra Club Florida

For FL Governor: Vote for **ANDREW GILLUM**. He has been endorsed by the League of Conservation Voters & Sierra Club. "Gillum is an environmental champion with a proven track record who has the foresight & leadership skills to protect Florida's people and natural resources."

What can you do about it? Vote for PRO-ENVIRONMENT candidates!

ODE TO RED TIDE

The water is murky, the facts are clear.

We can tell from the smell, RED TIDE is here.

Manmade pollution feeds it, they call it a bloom.

To our shore & sea life, it spells doom.

Don't swim in the waters, keep a mask within reach.

No one should get sick from a day at the beach.

Fishing is fun, you just can't beat it.

Catch all you can—just don't eat it.

How did it get this way?

8 years of cuts to Florida EPAs.

Cut budget \$700 million, current State Leaders took it away

& let "BIG AG" polluters off...No fine to pay.

Fired 134 employees, Ignoring scientific data,

Them experts & monitors jus' don't matta.

Remember, November 6th day,

Your Vote is your say.

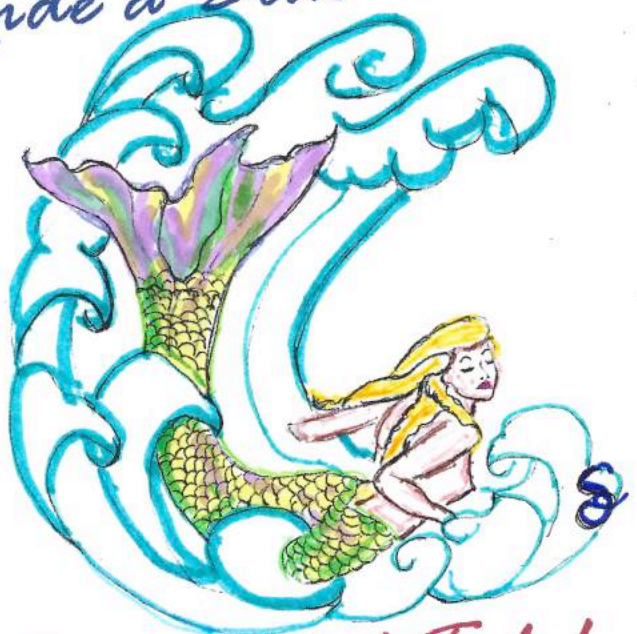

Poem & Card Design Created by Sherry O'Connell Copyright 2018

Compare to Rick Scott's Record on Environment: Slashed \$700 Million from water management districts. Fired 134 DEP employees. Stopped implementation EPA Clean water standards. Killed statewide septic tank program. Cut Forever Florida conservation program \$83 Million. Signed laws weakening standards for toxic chemicals flowing to water-ways, letting polluters police themselves. New Republic 8/14/18
"...Scott's new "Center for Red Tide Research" is nothing more than a publicity stunt. He is desperately diverting attention from his failures to address the pollution problems that have fueled massive toxic red tide and green slime...we need prevention not more studies. Every Florida-an should be mad as hell." Sierra Club Florida

For US Senator: Vote for **BILL NELSON**
Per League of Conservation Scorecard, he has a 95% rating and has voted pro environment on 104 bills since 2010. Sen. Nelson urged Sen. Maj. Leader McConnell to schedule another vote on the Water Resources Development Act (The Everglades Agricultural Reservoir is included in this bill which authorizes a reservoir to curb Lake O. discharge). The republican-lead Senate failed to pass this bill in July 2018. If bill passes the Senate, it would have to go to President for signature. Senator Bill Nelson continues his fight to ban oil & gas activities and protect our coastline, stand up to big polluters & corporations and protect from dangers of climate change.

We don't want the same politicians who let this Red Tide happen.

Ride a Blue Wave...

Stop a Red Tide!
